

SOFTWARELOKALISIERUNG IN VIELEN SPRACHEN

Was bedeutet der Begriff?

Der Prozess der Anpassung eines Softwareproduktes an regionale Märkte, d.h. an unterschiedliche Sprach- und Kulturräume, bezeichnet man als Softwarelokalisierung

Was bieten wir?

Wir lokalisieren Software (Anwendungssoftware und Betriebssysteme, Nachschlagewerke, Lernprogramme, Unterhaltungssoftware) auf den Betriebssystemen Windows, Macintosh und Linux.

Zu unserem Serviceangebot zählt u.a.:

- **Übersetzen der Benutzeroberfläche - Menübefehle, Listenfelder, Dialogfeld-Elemente wie Optionen, Schaltflächen etc.).** Wir setzen spezielle Hilfsprogramme ein, mit denen der zu bearbeitende Text „WYSIWYG“ und in einer geschützten Umgebung übersetzt wird. Dies ermöglicht einmal ein kontextbezogenes Übersetzen, erleichtert das erforderliche Anpassen der Textfelder an die Länge des Zieltextes und verhindert, dass die Übersetzerin bzw. der Übersetzer wichtige Programmcodes versehentlich löscht. Falls erforderlich übernehmen wir auch das Kompilieren der Quelldateien und das Testen der lokalisierten Software.
- **Übersetzen, Kompilieren und Testen der Online-Hilfe und Lernprogramme.**
- **Übersetzen des Handbuches und sonstiger Begleitmaterialien** (z.B. Verpackungsaufschriften, CD-ROM-Etiketten, Garantiekarten usw.) und DTP-mäßige Aufbereitung des Materials für den Druck. Generieren von Inhalts- und Stichwortverzeichnissen.
- **Anpassen und erneutes Einbinden von Grafiken und Bildschirmmasken.**

Unsere Tools

Während des gesamten Übersetzungsvorgangs - sei es nun bei der Lokalisierung der Programmdateien oder bei der Übersetzung des Handbuches - setzen wir ein Translation Memory Programm ein, bei dem alle Ausgangssprachlichen und alle Zielsprachlichen Satzsegmente in einem Translation Memory (Übersetzungsspeicher) abgespeichert werden. Trifft man zu einem späteren Zeitpunkt auf die gleiche Textpassage, schlägt das Translation Memory die schon gespeicherte Übersetzung vor.

Vorteile dieser Tools

Zu den Vorteilen zählen einmal der Einsatz einer durchgängig konsistenten Terminologie in allen zu übersetzenden Materialien. Hiermit wird sichergestellt, dass beispielsweise „abbrechen“ überall mit dem englischen „cancel“ übersetzt wird.

Ein weiterer entscheidender Vorteil ist die Preisersparnis bei Updates. Ergibt unsere automatische Analyse eine hohe Anzahl an Wiederholungen im Abgleich mit dem Translation Memory gewähren wir Rabatte für die Lokalisierung von Updates.

Englisch

Supports Palm OS® handhelds
Palm OS 1.1 and higher including PalmPilot, Be, Beos, BeX, 1.5, 1.5c, 1.5d, 1.5e, 1.5f, 1.5g, 1.5h, 1.5i, 1.5j, 1.5k, 1.5l, 1.5m, 1.5n, 1.5o, 1.5p, 1.5q, 1.5r, 1.5s, 1.5t, 1.5u, 1.5v, 1.5w, 1.5x,
